STUDENTS IN THE SUSTAINABILITY HOUSE ARE INVITED INTO A HOLISTIC, COMMUNITY LIVING LEARNING EXPERIENCE. RESIDENTS COLLABORATIVELY BUILD SKILLS AND KNOWLEDGE TO ENACT A SIMPLE YET RICH LIFESTYLE, GROUNDED IN THE URGENCY OF THE GLOBAL CLIMATE CRISIS AND THE INVITATION THE CRISIS PROVIDES TO CREATE DEEP AND LASTING FUNDAMENTAL CHANGES IN THE WAY WE LIVE.

- Residents learn stewardship through multidisciplinary hall programming that guides residents in audits of energy and water use, recycling and waste patterns, and local food production possibilities to lessen the group’s total impact on the environment.
- Residents learn essential community building skills and are offered programming on interrelated environmental, economic, and social justice concerns.
- The house boasts a wide variety of activities including vegetarian dinners, faculty and community interactions, organic gardening, aquaponics, and student led projects.
- Residents are encouraged to enroll in a for-credit class to complement their experience and receive recognition for their efforts. Priority is given to those students who are pursuing a major or minor related to global sustainability.
