Safety Tips for Children on Scooters

Toy-related injuries have risen dramatically over the past two decades. In the two most recent reports, scooters top the list of the most dangerous toys for kids. With their lightweight aluminum frame and tiny wheels — children place one foot on a board and use the other to propel themselves along — scooters can reach 25mph. The following recommendations may help to keep children safe from scooter-related injuries:

• The most common (and often most serious) injury sustained with a bike, on in-line skates, scooters, or while skateboarding, is a head injury. Wearing a helmet should be an automatic habit. Select an approved helmet that meets safety standards. Helmets should fit properly on your child’s head and also be fastened correctly. A properly-fastened and fitting helmet does not move around on the head.

• Wear protective gear, such as padding for wrists, elbows and knees, and closed-toe and slip-resistant shoes.

• Use caution around pedestrians. Riding on sidewalks, weaving around pedestrians or passing them from behind without warning is very dangerous for both the rider and the pedestrian. More people on the sidewalks means more obstacles. Walk the scooter instead of riding it in crowded areas.

• Children should avoid riding bikes and scooters after dark, but if your child will be riding at night, install reflectors and/or a light on his or her bike or scooter. Remind your child to ride on sidewalks where available.

• Before your kids head into high traffic areas, be sure they have the ability to stop suddenly or make quick turns.

• Stop and look both ways before entering a street, even from a driveway or parking lot. Look left, right and left again before entering the street.

• For their safety, young children should not use scooters without close supervision.

Upcoming Project at Palo Verde - We would like to make you aware of the following up-coming scheduled project for improvements around Palo Verde.

The Palo Verde Clubhouse will be Closed

The PV Clubhouse will be closed starting June 25th until July 3rd for repairs. It will not be available for any functions during this time.

Thank you for your cooperation as we work to maintain and improve our community.

Did you know? It takes a 15-year-old tree to produce 700 grocery bags? Every year nearly 900,000,000 trees are cut down to provide raw materials for American paper and pulp mills.
Before Moving, Remember to Forward Your Mail
It seems simple, but forwarding your mail can easily become forgotten amidst all of the other tedious, time-consuming tasks you need to take care of when you move.
- Update the U.S. Postal Service (USPS) at least two weeks in advance of your move if possible. Change your address in person at any US Post Office or go on-line at USPS.com.
- If you have a friend living in Palo Verde receiving your mail, include “c/o” and the name of person along with the address to ensure delivery to a PV address. Mail will not be delivered to unknown names.
- Send change of address notices to any vendors, accounts, or for magazine or other subscriptions.

Donate everything from binders to televisions!
Bins are located in each hall and around the community!

Goodwill can accept: Clothing, dishes, silverware, small electronics (lamps, clocks, toasters, blenders, stereos, DVD players), books, select bedding (bed sheets, pillows, blankets, comforters, NO mattress pads), towels, televisions, and computers/monitors, NO broken furniture.

ATRS can accept: Clothing, shoes, household textiles including stuffed animals, blankets, sheets, pillows, memory foam pillows, towels, shower curtains, comforters, drapery, and small rugs.

Donate non-perishable, unopened, labeled food items to the UCI FRESH Basic Needs Hub.

Your donation keeps usable goods out of the landfill and serves the community!
When you donate to Goodwill of Orange County, 92 cents of every dollar directly support Goodwill OC’s programs and services; and 91% of all donated goods find another home other than the landfill.
When you donate to ATRS Recycling, 98% finds a home other than landfill and 3 cents per pound will go to CRECE Cooperative, a community run micro-farm in Santa Ana.
When you donate to FRESH Basic Needs Hub, you help fight food insecurity on campus.

Donate non-perishable, unopened, labeled food items to the UCI FRESH Basic Needs Hub.

What not to put down the Garbage Disposal - Do not put anything in the garbage disposal that is not biodegradable food. When in doubt, throw it out! Or better yet - compost it!

Stringy veggies and vegetable peels - Fibrous materials are the worst culprit when it comes to crippling a garbage disposal. This includes celery, asparagus, artichokes, corn husks, and other vegetables that have any kind of stringy qualities to them. The stringy parts can wrap around the blades. The starches in foods such as in potatoes and rice will turn into a thick paste and may cause blades to stick.

Grease or oil - Greasy foods will distribute a film over the blades diminishing their effectiveness. Over time, it solidifies and begins to build up in your pipes.

Egg shells - The membrane on the inside of the egg can wrap around the blades.

Coffee grounds - The grounds build up like sediment in the pipes, causing blockage.

Pits, seeds, bones - Items such as bones and fruit pits can dull and even break the unit’s blades.

Anything in bulk - If you have a large amount of food scraps to get rid of, it is best to put it in the garbage or your compost bin.

Rice and pasta - Every time you turn the water on, the pasta and rice will continue to absorb water and block the pipes.

Harsh Chemicals - Harsh chemicals like bleach or drain cleaners can damage blades and pipes. Place a work order instead.
