Introducing an infographic: UCI Student Housing - Green Accomplishments

### Waste / Buildings
- 65% of all biodegradable waste reported by UC Irvine has been diverted from the landfill, representing a 77% reduction in waste sent to the landfill from 1990.
- The residence halls have over 300,000 square feet of new energy-efficient windows.
- Buildings in Phase 2 and 3 received an energy efficiency rating of LEED Silver.
- New buildings are being designed to achieve LEED Gold certification.

### Water
- 400,000 gallons of water saved per year.
- Over two-thirds of all water fixtures have been replaced with low-flow fixtures.
- Daily use per person has been reduced by 26%.

### Energy
- Over 8,000,000 kWh saved per year.
- Energy usage has been reduced by 82%.
- Over 2,000,000 kWh saved per year.
- Over 5,000,000 kWh saved per year.

### Cleaning
- 80% of car washes use recycled water;
- 10% of car washes use reused water;
- 10% of car washes use new water.

### Dining
- 97% of all waste comes from food service deliveries.
- 90% of all waste comes from food service deliveries.
- 90% of all waste comes from food service deliveries.
- 90% of all waste comes from food service deliveries.
